

# NDAB23002U Introduktion til diskret matematik og algoritmer

Last updated Wednesday, January 28, 2026.

## Course webpages

Webpage with official information (including schedule): <https://kurser.ku.dk/course/ndab23002u/>

Absalon course page with all practical information: <https://absalon.ku.dk/courses/89165>

## Course plan

Please note that there might be some minor adjustments in this plan depending on how the course develops, but what is written below is expected to be very close to what will actually happen.

Wk	Date	Time	#	Topic	Reading
6	Mo 2/2	13-15	1	Introduction; RAM model; algorithm complexity	CLRS Chs 1-2
6	We 4/2	10-12	2	Sorting & searching	CLRS Chs 2-3
6	We 4/2	13-15	3	Asymptotic analysis; stacks, queues, lists	CLRS Chs 3, 10
7	Mo 9/2	13-15	4	Sets, sequences, sums, integers	KBR 1.1-1.5
7	We 11/2	13-15	5	Integers (cont.), induction proofs <b>1<sup>st</sup> problem set due</b>	KBR 1.4-1.5, 2.4
8	Mo 16/2	13-15	6	Induction proofs (cont.)	KBR 2.4
8	We 18/2	10-12	7	Logic, more proofs	KBR Ch 2
8	We 18/2	13-15	8	Logic, more proofs (cont.)	KBR Ch 2
9	Mo 23/2	13-15	9	Combinatorics, counting, probability theory	KBR 3.1-3.4
9	We 25/2	13-15	10	Combinatorics, counting, probability (cont.) <b>2<sup>nd</sup> problem set due</b>	KBR 3.1-3.4
10	Mo 2/3	13-15	11	Matrices, adjacency matrices of graphs	KBR 1.5
10	We 4/3	10-12	12	Relations, trees, partial orders	KBR Ch 4 (not 4.6 & 4.8), 5.1
10	We 4/3	13-15	13	Relations, trees, partial orders (cont.)	KBR 6.1, 6.2, 7.1, 7.2, 8.1
11	Mo 9/3	13-15	14	Graphs: Intro, trees, graph representations	CLRS 20
11	We 11/3	13-15	15	Graphs: Graph traversal (BFS & DFS), topological sort, strongly connected components <b>3<sup>rd</sup> problem set due</b>	CLRS 20
12	Mo 16/3	13-15	16	Graphs: Graph traversal (cont.), topological sort, strongly connected components	CLRS 20
12	We 18/3	10-12	17	Graphs: Minimum spanning trees, Prim & Kruskal	CLRS Ch 21 + 19.1 & 19.3
12	We 18/3	13-15	18	Heaps and priority queues	CLRS intro part II, Ch 6
13	Mo 23/3	13-15	19	Graphs: Shortest paths, Dijkstra	CLRS Ch 22 intro, 22.3, 22.5
13	We 25/3	13-15	21	Course wrap-up; Q&A session <b>4<sup>th</sup> problem set due</b>	

## Textbooks

Kolman, Busby, and Ross: *Discrete Mathematical Structures*, DMA version, University of Copenhagen  
Cormen, Leiserson, Rivest, and Stein: *Introduction to algorithms*, 4<sup>th</sup> edition

## Schedule

All times are *cum tempore* with academic quarter (i.e., starting 15 minutes past the hour).

**Lectures:** The locations for the lectures are as follows:

*Mondays afternoons:*

- Weeks 6-13: Lundbeck Auditoriet, Biocenter, Ole Maaløes Vej 5.

*Wednesdays mornings:*

- Weeks 6, 8, 10, and 12: Auditorium 01, H.C. Ørsted Building, Universitetsparken 5.

*Wednesdays afternoons:*

- Weeks 6-13: Auditorium 01, H.C. Ørsted Building, Universitetsparken 5.

*In case of emergencies such as major disruptions in train traffic, we will meet at <https://lu-se.zoom.us/j/66875624789?pwd=azhpaG1BV1ZEbllZcm13SFNoZVFqQT09>.*

**Exercises:** Mondays 15-17 and Wednesdays 15-17 weeks 6-13. Schedules for the different exercise groups can be found via the webpages with official course information.

## Examination

**Problem sets:** *In order to take the exam, it is compulsory to pass 4 problem sets.* Note that this holds both for the ordinary exam and the oral re-exam. Problem sets will be posted one week before they are due, and should be *submitted before the first lecture on the due date* unless otherwise stated. Handing in a blank submission is not allowed, and implies automatic failure on the course. If a submission does not receive a passing grade, then it is possible to make a resubmission for the problems for which the original hand-in contains an actual attempt at solving the problem in question. See Absalon for the detailed rules.

*Due to the tight schedule before the exam, special rules will apply for problem set 4. There is no resubmission for this problem set. It is still compulsory to hand in, and in order to help students prepare for the exam there will be a grading threshold for pass. Students who fail to reach this threshold can still take the exam if the solutions are good enough to reach the threshold applied to the other problem sets for allowing a resubmission.*

**Ordinary exam:** Written exam Wednesday April 8.

**Re-exam:** Oral exam Monday June 29. This is a 30-minute exam without preparation. (Note that this is a different date than in the official exam schedule. Please do not hesitate to reach out if this would be any problem.)

## The team

**Lecturer:**

- Jakob Nordström (main lecturer, [jakobnordstrom.se](http://jakobnordstrom.se))

**Teaching assistants:**

- Anton Friis
- Christoffer Kassøe Juhl
- Cornelius Juul Mogensen
- Florestan Brunck
- Johanne Tang Reuss
- Theo Fabris
- Örn Steinar Sigurbjörnsson
