To:Jakob Nordström <jn@di.ku.dk>;

Hi Jakob

I made this quiz/survey in your course. There is a big red preview button in the bottom so you can see it as the students will:

<https://absalon.ku.dk/courses/56246/quizzes/69905>

It is unpublished, so you can publish it and link to it when you want.

You can of course edit the instructional text, the questions and the answers.

Let me know what you think and if you need help change anything?

Med venlig hilsen

Subject: Re: Kort snak om dit Absalonrum

And since you are asking if you can help...

This is probably something I could figure out if I just set aside some proper time to learn Absalon, but this is time I do not really have (if nothing else because that would take away time from giving the best possible lectures and making the best possible exercises), so my question is this:

Is there a simple way to conduct polls in Absalon? Say, something like a quick poll after the first two or three lectures with questions like:

- Please rate the appropriateness of the speed of the lecture from too slow via just right to too fast; five radio buttons.
- Please rate interestingness of material from boring to OK to exiting; five radio buttons.
- What made you want to take this course; form for free-text answer
- Any other comments so far; form for free-text answer.

It would be super-convenient to have an integrated tool for taking quick polls like this to get a better sense how the course is going. This is something that I used to do back at KTH in Stockholm (with some local hacker tools there), but there has just been too much pandemic chaos in Copenhagen for me to figure out how to do the same thing here.

Any advice or pointers would be greatly appreciated.

Hej igen

Here is some written feedback on last years Absalon course for Diskret Matematik og formelle sprog (DMFS)

Let me know if I can help with anything.

Hej igen,

As of now the discrete math and formal languages course is a solo effort from my side.

Hilsen

Jakob

Hi Jakob

That is totally understandable and sounds like a good solution.

I will look at it tomorrow and send it to you. Do you have colleagues who it might be relevant to share this with? Somebody else who have a stake in the Absalon course?

Mvh Niels Peter

Hej Niels,

I would be very interested in hearing your proposals, but I am badly, badly overloaded with work right now.

Would it perhaps be a start if you could send me an e-mail summary, that I could process at some point (probably during non-office hours) when I find a gap?

Venlig hilsen

Jakob Nordström

Kære Jakob

Der er ved at blive udrullet nogle fælles principper for brugen af Absalon, som jeg meget gerne vil høre dine tanker om og sammen, måske spotte nogle potentielle forbedringer af dit Absalonkursusrum.

Har du tid (30 min ca.):

- I eftermiddag?
- I morgen eftermiddag
- En dag i næste uge?

Med venlig hilsen
