

Additional questions from teacher(s)

207 could answer this evaluation schema.

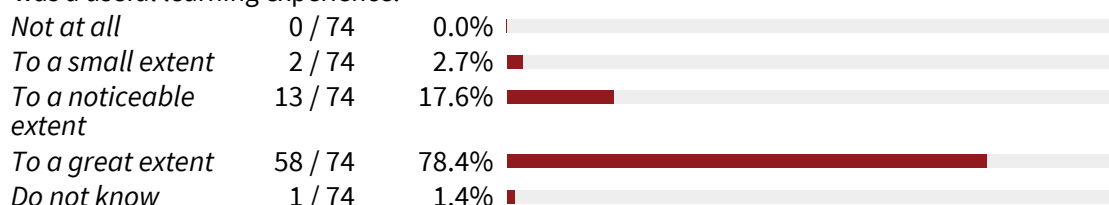

74 have answered this evaluation schema.

The answer percentage is 35.75%. : 74 / 207

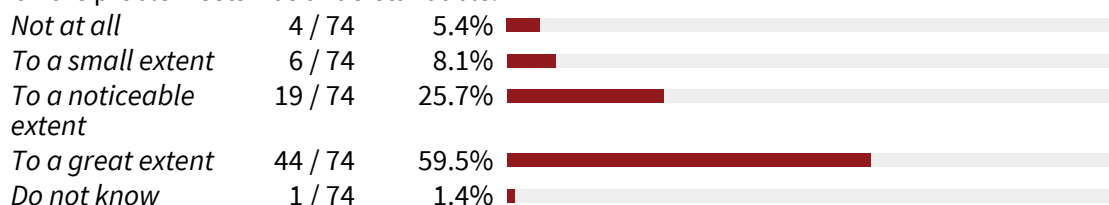

- 1 Please let us know what you think about the problem sets.** - It is good to have as a requirement that students should pass problem sets to be allowed to take the exam.

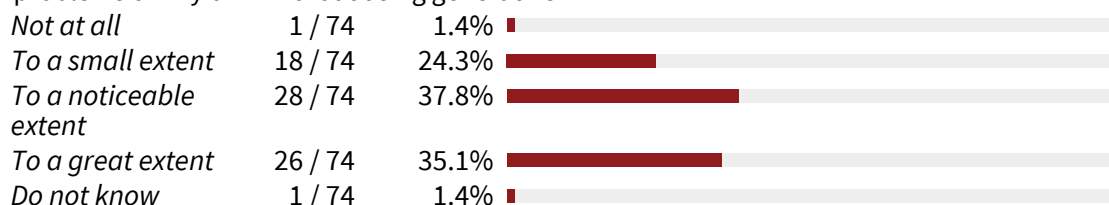

- 1 Please let us know what you think about the problem sets.** - Working on the problem sets was a useful learning experience.

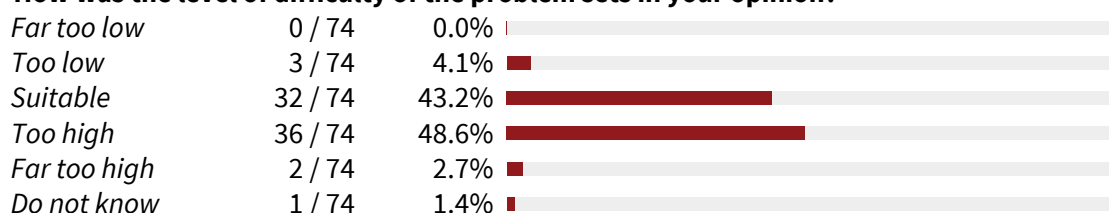

- 1 Please let us know what you think about the problem sets.** - The grading of and feedback on the problem sets was understandable.

- 1 Please let us know what you think about the problem sets.** - I was able to work on the problems on my own without using generative AI

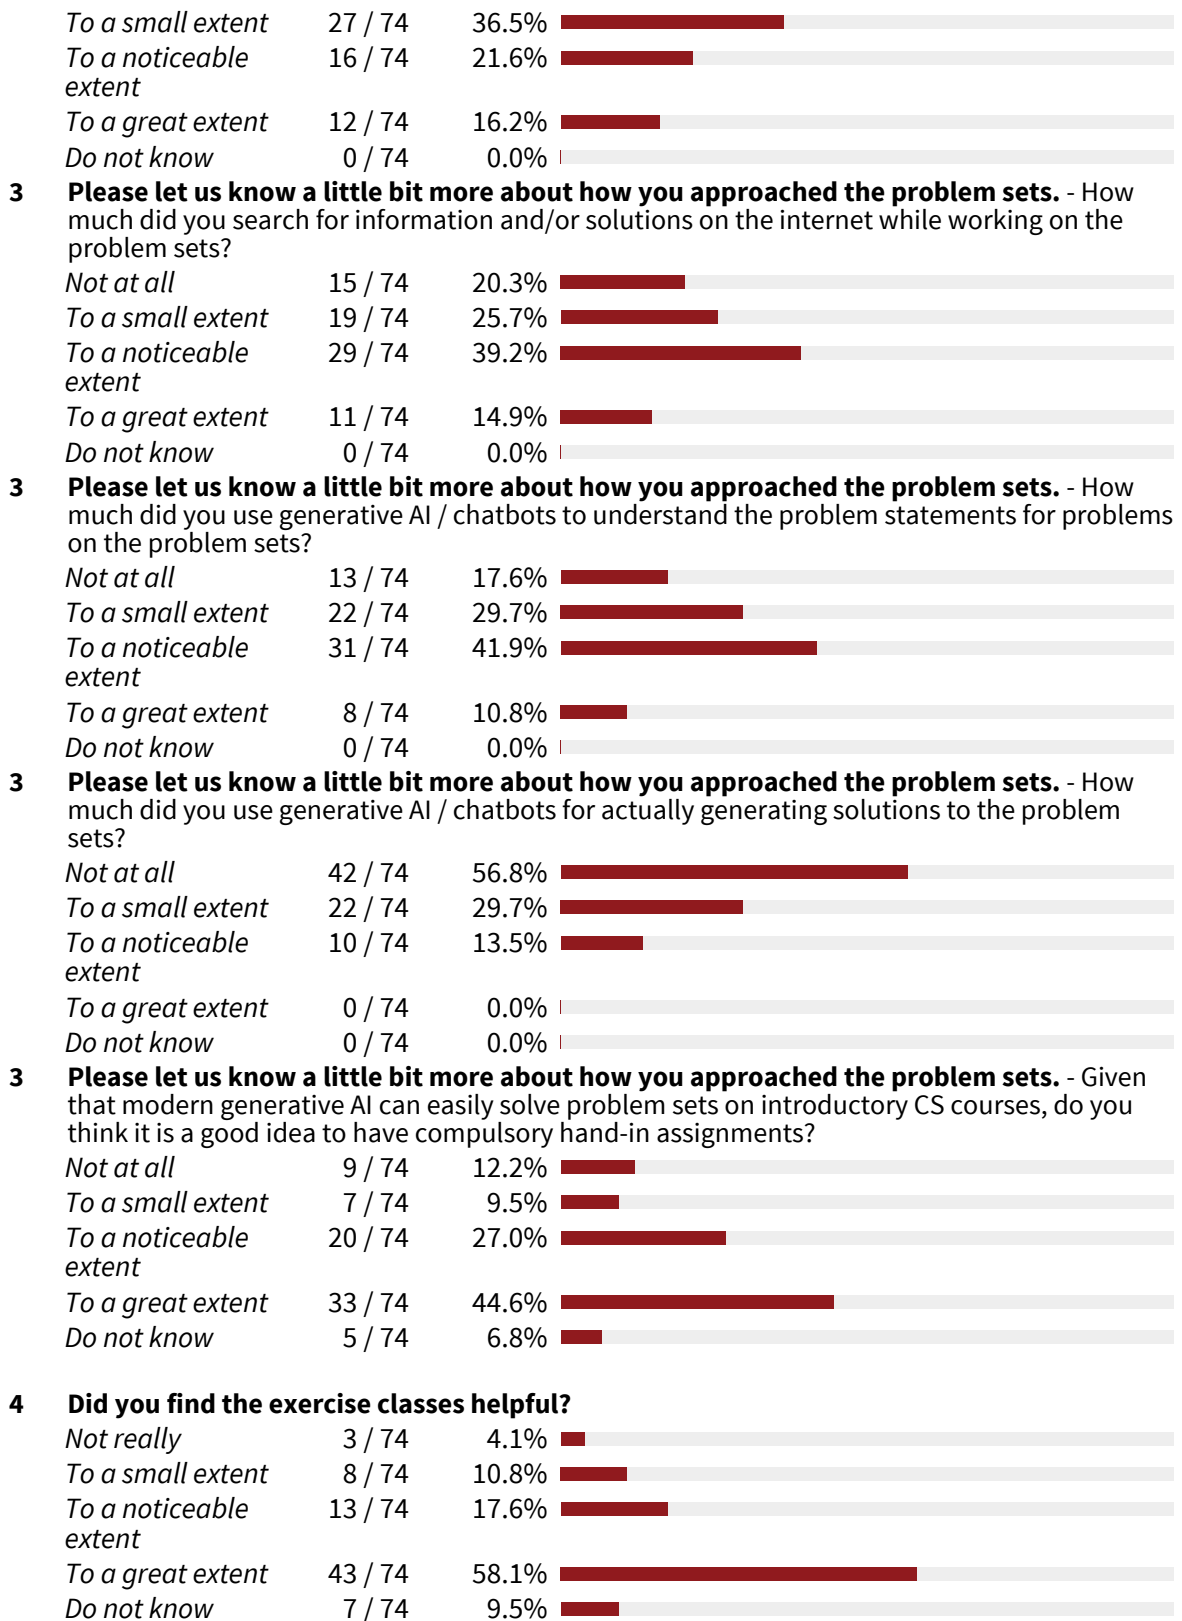

- 2 How was the level of difficulty of the problem sets in your opinion?**

- 3 Please let us know a little bit more about how you approached the problem sets.** - How much did you collaborate with other students when working on the problem sets?

5 Do you have any suggestions for aspects of the exercise classes that should be changed, or should stay the same?

- Same
- *I think it worked great*
- *I think, it was nice to have people that could explain concepts that I did not yet understand, and help me learn them.*
- *I think the exercise classes were great*
- *Every exercise class should do as Cornelius*
- *Having the assignments are good. If people tend to use genAI to solve their assignments instead of learning themselves, they will likely do worse on the exams compared to if they did not, but i dont think that is the concern of the course-responsibles.*
- *Stay the same.*
- *jeg synes personligt man bare skulle have tid til at lave aflevering og opgaver til exercise classes, istedet for endnu et oplæg.*
- Same
- *De var rigtig gode, det var helt klart der jeg lærte mest*
- *tidligere på dagen!
Anton og Johannes gik typisk forud for pensum og det var rart at møde op til forelæsningerne og forstå hvad der blev gennemgået da vi allerede havde fået intuitiv forståelse. Dog er jeg langt bagud på opgaverne i ugeplanerne*
- *Maybe doing more examples on the board together in class*
- *it was really good and helpfull*
- *I think more dry run exercises and larger quantity of exercises.*
- *I hvert fald for vores hold blev undervisningen også nogle gange udvidet til Lektiecafeer uden for øvelsestimerne. For dem af os, som skal på arbejde, var der derfor ting man gik glip af.
Jeg synes også, at det både var positivt og negativt at mange af emnerne blev gennemgået på forhånd i øvelseholdene. Der er bedre rum til at stille spørgsmål i øvelsestimerne, men når vi allerede havde gennemgået emnet, kunne man ikke lige så nemt spørge efter en forelæsning (hvis der havde været noget svært). Til gengæld var det rart ikke at gå blind ind til en forelæsning.*
- *Vores fungerede rigtig godt*
- *My suggestion for stuff that should stay the same is keeping Christoffer Kassøe Juhl hired as*

a TA. Ask him for advice on structure and style of teaching, because literally everything should stay the same with his classes. Refer to next question for details

- *The exercise classes were the best part of the course, my only suggestion is that maybe having one more could be even better.*
- *Undervisningen med Anton og Johannes var perfekt! Det var klart øvelsestimerne med dem jeg fik mest ud af ved kurset*
- *Our exercise classes were slightly ahead of schedule, likely due to our 'class' picking up on early topics quite quickly, and TAs adapted to this, diving into more advanced topics earlier than the lectures. This gave us more time to wrap our heads around these advanced topics, without spending (unnecessary) time on the easier topics we were somewhat familiar with from other courses.*
- *Øvelsestimerne var generelt meget udbytterige, da man kunne spørge om så meget man have lyst til.
Der var dog rigtig mange øvelser på ugesedlerne, så det var ret svært at finde ud af hvilke som var mere end mindre vigtige, hvis altså der kunne være sådan en inddeling af opgaverne. Det ville måske have været rart at der var en prioriteret række følge, selvom det også var rart, at øvelserne var delt ind i emner, sådan at man kunne fokusere på det man havde svært ved.*
- *De skal ligge tidligere på dagen. Feks 8-10 el 10-12 og så forelæsning 10-12/13-14. (se første side af feedback)*
- *1. Gør dem sværere (eller i det mindste inkluder visse svære opgaver)
2. Strømlin alle undervisningstimer som i andre kurser, hvor underviseren selv specificerer præcis, hvad der bør arbejdes på. Undervisningstimerne var meget forskellige fra TA til TA.
3. Inkluder opgaver, der er mere eksamenslignende uden blot at tage forrige eksamensopgaver, da der er meget få, og disse bør gemmes til læseferien.*

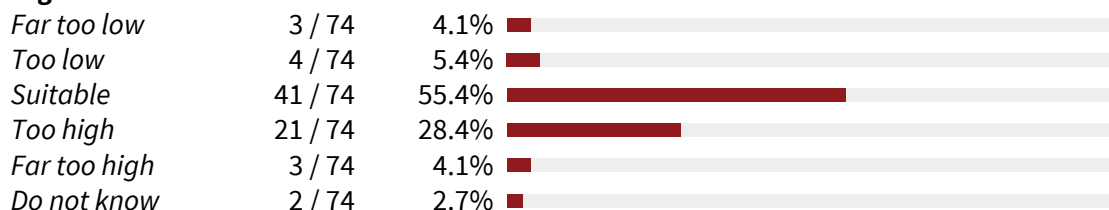

6 Do you have any concrete feedback for the TA(s) whose exercise classes you attended? Please use the given name of the TA if you want them to be able to know about feedback directed specifically to them.

- *Jeg havde Christoffer og det fungerede super godt, han havde nogle super hjælpsomme slides med og en lille præsentation og det fungerede super super godt. Samtidig var han super god til at hjælpe og forklare når der var spørgsmål.*
- *Cornelius er super god TA, god til at lære fra sig og forklare svære koncepter.*
- *I think Flo did a great job.*
- *Cornelius - Perfect, I Think I learned more in his class, than I could have hoped for*

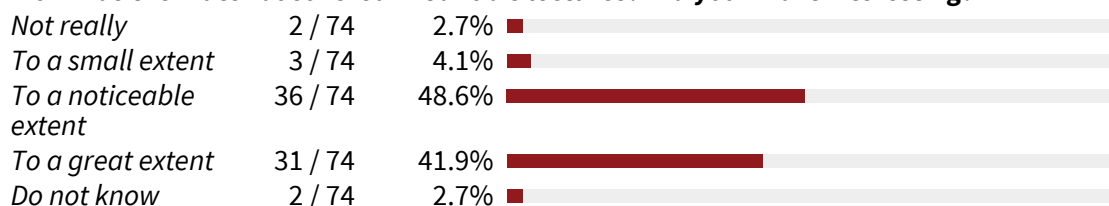

- *Jeg havde Christoffer som TA*
 - *Kombination af tavle-gennemgang af de vigtigste pointer + ellers bare arbejd-selv med eventuel hjælp fungerede super godt*
 - *Powerpoints'ne med klare, koncise forklaringer af hovedkoncepterne var awesome*
 - *Eventuel gennemgang af evt materiale, der ikke blev nået til forelæsningsne men skulle anvendes i afleveringer var også enormt rart*
- *Johannes and Anton do a great job as TAs*
- *Cornelius er en god og meget engageret TA men jeg savnede mere tid til at lave opgaver.*
- *Anton og Johannes har været virkelig gode!*
- *Cornelius, rigtig god og engageret*
- *Christoffer*
Han var virkelig god til at forklare tingene på flere forskellige måder, og altid velforberedt :))
- *Kæmpe cadeau til Anton og Johannes! søde og sjove og dygtige så al kærlighed til dem*
- *Christoffer is really good at explaining things and is really helpfull*
- *The feedback on the assignments sometime lacked detail. For example, I could get 25/30 points and then it said small detail missing, but didn't tell me what so I know what to do better on the exam.*
- *De er goated*
- *Anton og Johannes gjorde det godt, som altid. Jeg synes de var hårde i deres feedback til vores opgaver, men det er jo kun godt, når opgaverne først og fremmest er en optakt til eksamen. De var også gode til at forklare.*
- *Good people*
- *Johannes and Anton are amazing!!! KDV loves them <333 they explained concepts Jakob couldn't quite get around, made concepts clear with visuals and great slide shows and are super engaged.*
- *Johannes og Anton var de bedste TA's de kunne forklare komplekse emner på en måde der var lettere at forstå, og de var virkelig gode til at hjælpe, og deres feedback på afleveringer gav rigtig god mening. Virkelig virkelig stor ros til dem.*

- *Christoffer Kassøe Juhl is one of the best teaching assistants I've ever had. His structure of using both a premade slideshow along with whiteboard at the start of all classes works really well. His thorough preparation along with his very engaging and enthusiastic style of teaching is great. Another detail that makes his classes great is use of jokes/memes within the slides. He does not comment on the memes he added, but they still work great with keeping engagement high. All in all, very passionate and skilled teacher*
- *Christoffer was such a good TA. The best I've had so far!*
- *Johannes og Anton fra KDV har gjort et virkelig godt stykke arbejde. Mega fedt at være lidt forud, så forelæsningsne er nemme at komme igennem*
- *Anton og Johannes var fantastiske. De er virkelig gode til at viderformidle på en forståelig måde. Det er tydeligt at de er engagerede. De var altid lidt foran i pensum, hvilket gjorde forelæsningsne lettere at forstå. Har ingen kritik til dem!*
- *Anton and Johannes were outstanding. If anyone in management has the ability to give them some sort of letter of recommendation, these two should get one.*
- *Cornelius Juul Mogensen did a really stellar job at covering the topics on the course and was a great ressource for understanding things covered in class, that needed to be repeated. Looked forward to each excercise class. Would recommend you hire him again for this course next year.*
- *Anton og Johannes er vanvittigt dygtige undervisere. De formidler enkelt, let forståeligt og bryder abstrakte begreber ned på et meget håndgribeligt niveau, der let kan relateres til løsning af problems/øvelser. De møder altid op velforberedte og med masser af overskud og fortrøstning*
- *Johannes Tang Reuss gav til tider feedback, der var markant mere kritiserende end andre.*
- *Anton og Joahnnes er guld! Der er så meget engagement og et virkelig trygt sted at lære. Kæmpe klapsalve til dem*

7 How did you find the pace of Jakob's lectures? Was the speed too low, suitable, or too high?

8 How was the material covered in Jakob's lectures? Did you find it interesting?

9 Do you have any other feedback to Jakob as a lecturer?

- *End the lecture in time*
- *It was not all the time he had time for all the part of what he wanted to talk about.*
- *There was a lot of material and sometimes it went quite quick. Maybe thats inevitable given the course, but if it could be adjusted it would be nice.*
- *Some times the examples used made it harder to understand the material then needed*
- *Ik gå over tid!*
- *overfortolker spørgsmål og skræmmer nærmest folk væk fra at stille ham spørgsmål fordi "hvad står der dér" bliver til en 10-minutters genforklaring af et helt bevis, eksempelvis.*
- *I very much appreciate that you use the boards instead of slides.*
Sometimes the pace of the lectures were not so well-balanced, too often I found that simple topics were covered in great detail, leaving less time for more challenging material eg. proofs and complex concepts
- *He is a very good teacher. And funny*
- *Jeg synes Jakob har gjort det virkelig godt, og har virket virkelig engageret.*
- *God og engageret, god til at lære fra sig, mangler god håndskrift til tavlen*
- *mindre tidsoptimistisk måske?
men jeg fik meget ud af hans forelæsninger*
- *Created a good learning atmosphere*
- *the handwriting was hard to read, we rarely got through all of the things in any lecture.*
- *Very good*
- *Jakob fik mig virkelig til at elske dette fag, så meget at jeg kunne overveje at fortsætte med flere kurser indenfor algoritmer i fremtiden. Det var til gengæld ærgerligt, at man skulle bruge meget energi på at forsvare kurset overfor sine medstuderende. Men jeg er helt klart ikke den eneste, der godt kunne lide det.*
- *It was good lectures, but the slides and lecture notes that was handwritten was very hard to use.*
- *Generelt rigtig godt, måske ikke vaske tavlen, da det blev svært at læse hvad der stod når tavlen var våd og lidt hvid.*
- *Keep doing what you are doing!*

- *Keep going king*
- *Nice energy*
- *Måske planlæg tiden lidt bedre - ofte fik vi kortere pause eller gik over tid fordi hele pensum for forelæsningen ikke blev nået*
- *Stop using multicoloured chalk and consider switching over to PowerPoints instead of bord*
- *Besides his handwriting, very good and helpfull*
- *I wasn't bothered by Jakob not using a microphone...*
- *I left most lectures feeling that I grasped the most essential and that I can learn what I did not understand at first by Working on problem sets and asking my Ta. Good at getting the essential across but also good at glimt into the detail. Good pacing of lectures generally.*
- *Det eneste var, at Jakob kom lidt i tidsnød i slutningen af nogle af forelæsningsne, hvilket gjorde tempoet alt for højt og dermed umuligt at lære det som han gennemgik.*

Ud over dette var det meget spændende og Jakob var meget engageret og inkluderende, sådan, at vi blev inddraget og ikke "bare" sad og lyttede.
- *fedt*
- *Too much too fast*
- *Nej*
- *The rules for the problem sets feel like they should be relaxed a bit or be instead of the exam. Else if you want to keep the exam as is, it would be helpful to deliver the problem sets in hand so we can use it for the exam.*
- *Virkelig sjov og dygtig*

10 How did you find the pace of Amir's lectures? Was the speed too low, suitable, or too high?

Far too low	16 / 74	21.6%	
Too low	26 / 74	35.1%	
Suitable	18 / 74	24.3%	
Too high	3 / 74	4.1%	
Far too high	2 / 74	2.7%	
Do not know	9 / 74	12.2%	

11 How was the material covered in Amir's lectures? Did you find it interesting?

Not really	16 / 74	21.6%	
To a small extent	37 / 74	50.0%	
To a noticeable extent	11 / 74	14.9%	

To a great extent	2 / 74	2.7%	
Do not know	7 / 74	9.5%	

12 Do you have any other feedback to Amir as a lecturer?

- *Lad være med at bruge slides. Det er super kedeligt og meget mindre lærerigt end tavle*
- *It was boring and a lot of definitions, again maybe thats inevitable when you have to get a lot of definitions to learn.*
- *Ikke kun slides!*
- *laaangsom, snakker meget lavt og ikke særligt stimulerende i sin helhed.*
- *Forelæsningerne virkede primært bare som oplæsning af en powerpoint*
Powerpointen var dog tilpas uorganiseret til at man ikke bare kunne skimme slides'ne
- *Bedre slides*
- *A dead fish would have been more interesting to listen to.*
- *Not so engaged in the lecture,*
It was as he did not want to be there.
- *I don't think slides are the best way to learn, because it is hard to take notes when the slides change so fast.*
- *For mig fungerede det ikke så godt. PowerPointet gik for hurtigt, og man savnede Jakobs gode energi.*
- *Brug tavlen i stedet for slides, og være mere engageret*
- *The lectures were just somewhat boring, like a little bit soulless. I felt like I've could have just spent the time reading in the book, and gotten better results.*
- *Det gik lidt langsomt i starten, og så lidt for hurtigt til sidst, når det Amir gennemgik steg i sværhedsgrad. Jeg ville hellere have gennemgået de "lettere" ting lidt hurtigere, sådan at det ikke var tidsnød til sidst, og man dermed kan få gennemgået de sværere ting mere dybdegående.*
Amir virkede ikke ligeså engageret som Jakob, selvom der til tider kom lidt sjov ud af ham.
- *Nej*
- *Meget underligt at gå fra tavleundervisning til slides i et kursus, hvor det gælder om håndskrevne noter.*

13 Do you have any other comments or suggestions regarding aspects of the lectures that should be changed, or that should stay the same?

- *I think it's very good to have assignments during the course. Don't let AI change this. Yes, you can probably solve them that way if you want to, but that will just bite whoever does so at the exam. For the students that want to learn, it is very useful to have assignment that prepare you for the exam throughout the course.*
- *Please continue using the blackboards instead of slides*
- *Same*
- *Be engaging! Be visual, and verbal. Show that you love your career*
- *the exam could be different, maybe it could be more precise in what topics could be on the exam, but a list of the different questions that occur on the exam, so the student know what to focus on in the exam period.*
- *Behold den aktive tavleundervisning, for jeg tror man ville miste koncentrationen ved slides.
Min største kritik er nok ift. bogen. Jeg anerkender, at det er begrænset hvor meget man gøre for de studerende, men det at vi skal købe en 1000-kroners bog at tage med til eksamen er lidt for meget.*
- *It was good lectures, but the slides and lecture notes that was handwritten was very hard to use.*
- *I personally had a hard time reading the lecture notes' handwriting*
- *On multiple occasions, I thought it odd that so much time was dedicated to stuff like set-notation and other mathematical notation (for all, there exists in particular), when every bachelor's that takes this course already has been introduced (or rather just thrown into it with the expectation to just pick it up) to it in "Introduction to Mathematics for Science" (MatIntroNat)*
- *Nu når det er lidt presset i forhold til tid i forelæsningsne på kurset, så benytter vi nogle gange to forelæsnings om onsdagen, jeg ved ikke om det er værd at tage i betragtning at have en ekstra onsdag med to forelæsnings for at kunne nå alt materialet?*
- *længere pauser, hold dig til tidsplanen*
- *Nej*

14 Some other courses have or have had study cafes, but IDMA did not have study cafes this year. Do you think that having study cafes would have been helpful?

Not really	8 / 74	10.8%	
To a small extent	19 / 74	25.7%	
To a noticeable extent	13 / 74	17.6%	
To a great extent	13 / 74	17.6%	
Do not know	20 / 74	27.0%	

15 Do you have any creative (and realistic) ideas for how the IDMA course could be made better?

- *If the mandatory assignments had 1-2 short programming exercises (e.g. coding up algorithms)*
- *It should not be hard to understand what the question is asking of you.*
- *Dont have any ideas right now*
- *Hvis man kun skal bestå 3/4 problem sets for at gå til eksamen. Specielt da ingen genaflevering på problem set 4.*
- *I took a course on discrete mathematics a while back (DisMat) on the mathematics bachelor programme, and in that course, participation in the TA sessions was compulsory, where each student was put into a group, and said group would at least once have to go to the blackboard and present a proof of something. Perhaps not necessarily a proof for this course, but at least walk the rest of the class through a solution to a given problem. I believe this was iterated weekly and it "forced" people to learn the material. If one did not show up to their presentation day (without good reason), they were not allowed to sit the exam. I think some variation of this could be beneficial.*
- *Part of Problem set 3 was too difficult and somewhat disconnected from the rest of the course, I found that disillusioning. In general a better connection between lectures and problem sets would be an improvement.*
- *I think maybe the ugeseddel should contain exercise that realistically could be made each week. For example in Linear Algebra Dat, I was always able to make all the weekly exercises - especially also because the time in the exercise classes was for making those exercises and not for listening to the TA give another presentation of the material.*
- *Arbejdsbyrden og det vi har lært i slutningen af kurset har været virkelig svært. Jeg ved ikke hvordan man konkret kan ændre dette, da jeg forstår at vi først nu har værktøjerne til at sætte det hele sammen. Men det er lidt voldsomt at skulle lære så meget nyt og svært så sent i kurset.*
- *Nej*
- *I would have liked the course topics to be more clearly defined, so it would be easier to keep track of where you were in the course, perhaps with a list.*
- *Måske kunne man lave videoer til nogle af de svære beviser, så man kan se dem igen med Jakobs forklaring. Det kan være lidt svært at følge på papir.*
Lave løbende quizzes, så man ved, at man er godt med.
- *I don't know, where to put this, so here we go.*
Assignment 3 eigenvector problem was insanely difficult, if I were to estimate I would guess that less than 1% solved the problem without substantial help from AI.
- *KDV havde en ugentlig lektiecafé hvilket bare var en kæmpe hjælp, så tror det vil fungerer*

godt, hvis hele årgangen havde sådan et tilbud.

- *I think it has been a very good course. Generally (for this whole first year) I haven't yet felt that I have had time to get really deep into any material and really learn it, because there is always so much you have to get through, and I miss having more time, but since this goes for every course so far maybe this is by design? Or at least just a general problem.*
- *Switch to powerpoint*
- *Either keep the pace in lectures as they were this year and let (maybe some, not all) exercise classes go ahead of the lectures for those that feel they already understand early topics, while still accommodating students that may need to get to grips with early topics (thinking particularly about mathematical proof notation as an example of a concept that lectures spent too much time on, but some may still need to familiarize themselves with). Or increase the pace of the lectures. I felt some proofs were hyped up to be more complex than what they actually were.*
- *A little more structure materials page on Absalon.*
- *Not as much content and more focus on the important stuff*
- *Vær mere målrettede og hold niveauet højere fra starten. Forbered bedre eleverne til eksamen. Jeg synes at kurset i Sandsynlighed og Statistik er et stjerneeksempel på dette.*
- *The feedback on the problem sets rarely helps you to what you misunderstood when you make a mistake, so improving the feedback would go a long way.*
