

GRADING SHEET FOR IDMA ORAL EXAM JUNE 2026

We have already chosen a random number using <https://www.random.org/>, determining in which order questions are presented.

You should not expect to get through all of the questions in the oral exam question set.

You can always ask to skip forward to the next question, or flip back to a previous question.

At the end of the exam, you will be assessed on how many questions you were presented with and how well you answered them.

Whether you solve a problem or not is not a binary yes-or-no question.

There will be a dialogue, and we will take into consideration how well you reason, even if you do not manage to solve a problem.

Time	User ID	Name	NUMBER	Algorithms	Logic	Relations	Combinatorics	Sorting	Graphs	GRADE	Note
JUNE 24, 2026											
09:00	ZJM580	Gustav Ingels Møllerup	3				1-a wrong 2-b OK 3-b, then 3-a	SKIPS	DFS clean Dijkstra OK except confused	4	
09:30	DQR746	Lucas Ullerup Marshall	1	Explanation OK $\Theta(n^2)$ tight Faster code OK		Perfect	1-a wrong 2-b OK not much explanation		spanning tree & heap	2	
10:00	NPZ178	Abel Asrat Ridgewell	2		① Neither ② Tautology	M_1 reflexive M_3 clean M_2 impossible proof	2-a, 3-b clean 1-c without full explanation	clean, incl. $\Theta(n \log n)$		12	
10:30	GHP118	Theodor Kristensen	4		Confuses $\rightarrow 2 \leftrightarrow$ SKIPS				DFS mostly OK; Dijkstra completely wrong	00	
11:00	RWL997	Kian Kaarup Bøgh	2		First formula wrong	M_1 refl M_2 trans. sym M_3 inv + sym	symm clean does not yield symm matrix	Split OK Merge wrong Cplx $O(n^2)$		00	
11:30	DPS824	Lea Skov Rasmussen	NO	SHOW					Dijkstra confused then SKIPS		
JUNE 29, 2029											
09:00	CGQ654	Oliver Fisker Gleerup	3	Pyran on string size 9 gets confused	then gets downright asymptotics confused		1-a wrong 2-b missing full explanation SKIPS		DFS confused backtracks a finally fixes this after multiple	00
