Hi Jakob

Hope you're doing well!

I got a worse than expected result on my IDMA - Exam, so I would love some insights as to how I could perform or word my answer better in regards to the reexam.

I've had issues with incorrect grades in the past, so I just wanted to double-check.

Here is what I expected my total score of points to be:

(Problem 1(30 pts):

a) wrong

b) correct 30 pts

Problem 2 wrong 0 pts

Problem 3 Did not answer 0 pts

Problem 4 45 pts

a) got a correct

b) only answered half, and I correctly put that it was in fact not a tautology, but not how to correctly turn it into a tautology, by adding $\neg$

Problem 5 0 pts

problem 6 0 pts

Problem 7 80 pts

Problem 8 0 pts

Problem 9 120 pts

)

This amounts to a score of 275 pts, which would have yielded a grade 7 and not the 00 that I got as my result.

It would also mean a lot to me if you could please send my graded exam, so that I can study and improve for the reexam.

best regards,

Gustav
